

I know my plan to change the hole earth from turning into garbage but into very clean earths.

And I would help the hole community from smoking and filling up the hole air of smoke and I ^{everyone} would live in a fresh clean earth. Everyone would love this idea.

Cleaning earth would help everyone in my family and everyone in my world, because its going to clean all the air and its going to clean everything still alive in the hole world and it would fix the green grass and the healthy trees and plants grow bigger and help the earth clean so it will really get the best world in the universe.
