

I smilely smallty der
I like the hole life in my
life but the first thing in my
life that I love is that
I have a hole life. If I didn't
have a life I wouldn't even be
alive and I just love myself.
You know I always love myself
because I have a home and
a family that's always out for
me and I love it.

I have a big huge family,
that just is very good at everything
but sometimes there always mad
and very angry all the time and
everyday sometimes. So I would
love to have the best family and
I loved to get a hug from
them everyday.

I thing I would change in
my life is stop people from smoking,
littering, wasting water, and making
forest fires. Its gonna change
everything in an not healthy
earth into a very healthy earth.
